

Micro parts with high accurate reproduction of detail

## MW injection® 50-4: special version

- ✓ Basic construction like MW injection® 50
- ✓ Patent-registered procedure for the implementation of variothermic temperature control
- ✓ 4-stations-machine with carrier for workpieces
- ✓ Synchronism of the process stages heating, injection, cooling and ejection
- ✓ Reduction of energy requirements
- ✓ Reduced cycle time in comparison with standard injection molds
- ✓ Use of energy efficient heating and cooling methods
- ✓ Reduction of mold costs – mold only composed of shaping plates
- ✓ Additional stations, e. g. for coating, includable

→ Low-cost manufacturing of  
micro parts with high accurate reproduction of detail
